

# Database Management Systems – MCIS 5133

Dr. Cheng Hong

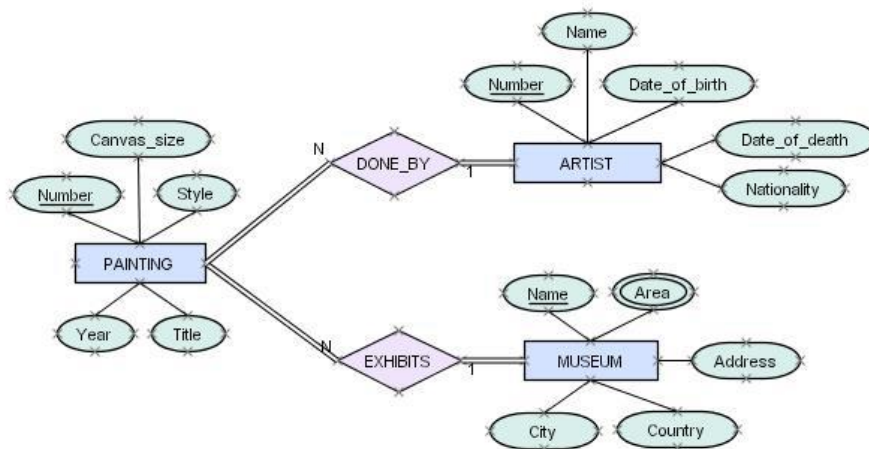

## Homework 3 – Spring 2022

Name: Saranya Balasubramaniyan

Student ID: 999901316

Section: 001

1.

PAINTING

<u>Number</u>	Canvas_size	Style	Year	Title	Anumber	Mname
---------------	-------------	-------	------	-------	---------	-------

ARTIST

<u>Number</u>	Name	Date_of_birth	Date_of_death	Nationality
---------------	------	---------------	---------------	-------------

MUSEUM

<u>Name</u>	Address	Country	City
-------------	---------	---------	------

MUSEUM\_AREA

<u>Mname</u>	<u>Marea</u>
--------------	--------------

Steps followed:

1. Mapping of Regular Entity Types

Regular entities identified: Painting, Artist, Museum

Simple Attributes of Painting: Number, canvas\_size, style, Year, Title

Simple Attributes of Artist: Number, Name, Date\_of\_birth, Date\_of\_death, Nationality

Simple Attributes of Museum: Name, Address, Country, City

Primary key for Painting: Number

Primary key for Artist: Number

Primary key for Museum: Name

2. Mapping of Weak Entity Types: No Weak entities identified

3. Mapping of Binary 1:1 Relation Types: There are no 1:1 mapping of relation types

4. Mapping of Binary 1:N Relationship Types: The foreign key approach

Done\_by: A number in Painting is a foreign key mapping to Number in Artist relation

Exhibits: Mname is a foreign key mapping to Name in Museum relation

5. Mapping of Binary M:N Relationship Types: There are no M:N mapping of relation types

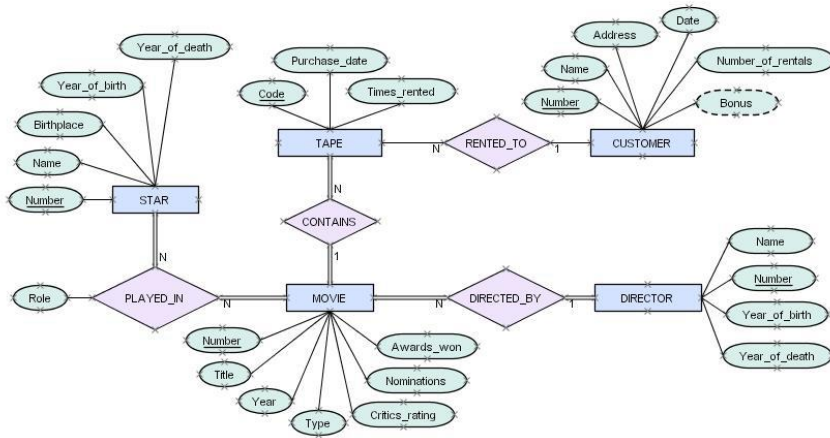

6. Mapping of Multivalued Attributes:

Area in Museum Relation: Creating a Relation, MUSEUM\_AREA with attribute Mname and Marea.

Both of the attributes would be keys Mname is a foreign key from Name of the relation Museum.

7. Mapping of N-ary Relationship Types : There are no N-ary relationship types

2.

STAR

<u>Number</u>	Name	Birthplace	Year_of_birth	Year_of_death
---------------	------	------------	---------------	---------------

TAPE

<u>Code</u>	Purchase_date	Times_rented	Mnumber	Cnumber
-------------	---------------	--------------	---------	---------

MOVIE

<u>Number</u>	Title	Year	Type	Critical_rating	Nominations	Awards_won	Dnumber
---------------	-------	------	------	-----------------	-------------	------------	---------

CUSTOMER

<u>Number</u>	Name	Address	Date	Number_of_rentals
---------------	------	---------	------	-------------------

DIRECTOR

<u>Number</u>	Name	Year_of_birth	Year_of_death
---------------	------	---------------	---------------

PLAYED\_IN

<u>Mnumber</u>	<u>Snumber</u>	Role
----------------	----------------	------

Steps followed:

1. Mapping of Regular Entity Types

Regular entities identified: Star, Tape, Customer, Movie, Director

Simple Attributes of Star: Number, name, Birthplace, Year\_of\_birth, Year\_of\_death

Simple Attributes of Tape: Code, Purchase\_date, Times\_rented

Simple Attributes of Customer: Number, Name, Address, Date, Number\_of\_rentals

Simple Attributes of Movie: Number, Title, Year, Type, Critics\_rating, Nominations, Awards\_won

Simple Attributes of Director: Name, Number, Year\_of\_birth, Year\_of\_death

Primary key for Star: Number

Primary key for Tape: Code

Primary key for Customer: Number

Primary key for Movie: Number

Primary key for Director: Number

Derived Attribute : Bonus in Customer (The attribute is not included in the schema but the derivation rules are taken into account during implementation)

2. Mapping of Weak Entity Types: No Weak entities identified.

3. Mapping of Binary 1:1 Relation Types: There are no 1:1 mapping of relation types

4. Mapping of Binary 1:N Relationship Types: The foreign key approach

Contains: Mnumber in Tape is a foreign key mapping to Number in Movie relation

Rented\_to: Cnumber in Tape is a foreign key mapping to Number in Customer relation

Directed\_by: Dnumber in Movie is a foreign key mapping to Number in Director relation

5. Mapping of Binary M:N Relationship Types:

Played\_in: Creating a relation Played\_in. Attributes: SNumber ( from Number in Star relation), MNumber(from Number in Movie relation), Role

6. Mapping of Multivalued Attributes: There are no multi valued attributes.

7. Mapping of N-ary Relationship Types : There are no N-ary relationship types
